

Dear Hiring Team,

I am excited to submit my application for the Summer STEM Instructor position at the University of Miami with Lavner Education. As a Computer Science student at the University of Florida, with hands-on technical skills in C++, Python, and GitHub, a passion for STEM education, and experience working with students, I am eager to contribute to an inspiring and engaging camp environment this summer.

My academic experience has given me a strong foundation in technology, including data structures, software development, and project management. Beyond the classroom, I have extensive experience working with children through both nannyng and serving as a Volunteer Leader at Winshape Camps. Through these roles, I planned activities, ensured a safe and engaging environment, and developed strong leadership, organizational, and communication skills. Additionally, I have volunteered at PK Yonge Elementary through Girls Empowered by Math and Science, helping to facilitate hands-on STEM activities and inspiring young girls to explore and excel in science and technology.

Combined with my technical abilities, my background working with children equips me to deliver Lavner's innovative goals in coding, robotics, game design, and digital art. I am also fluent in Spanish and recently studied abroad in Spain, giving me a strong global perspective and the ability to connect with a diverse group of students and staff.

I am enthusiastic about the opportunity to be part of a mission-driven team and help empower the next generation of students. I would love to bring my passion for education, technology, and mentorship to Lavner Education this summer. Thank you so much for your time and consideration. I look forward to the opportunity to contribute and grow with your team.

Best regards,
Victoria Villasana
